ABSTRACT

The general purpose of the occupational analysis is to provide workable, basic information dealing with the many and varied duties performed in the laboratory assistant occupation. The document opens with a brief introduction followed by a job description. The bulk of the document is presented in table form. Eleven duties are broken down into a number of tasks and for each task a two-page table is presented, showing on the first page: tools, equipment, materials, objects acted upon; performance knowledge (related also to decisions, cues and errors); safety--hazard; and on the second page: science; math--number systems; and communications (performance modes, examples, and skills and concepts). The duties include: performing laboratory techniques, hematology tests, clinical chemistry tests, urinalysis, bacteriology procedures, blood bank and serology procedures, histology procedures, and EKG; operating laboratory equipment; utilizing communication skills; and collecting blood. TABLE OF CONTENTS

FOREWORD

The occupational analysis project was conducted by The Instructional Materials Laboratory, Trade and Industrial Education, The Ohio State University in conjunction with the State Department of Education, Division of Vocational Education pursuant to a grant from the U.S. Office of Education.

The Occupational Analysis project was proposed and conducted to train vocational educators in the techniques of making a comprehensive occupational analysis. Instructors were selected from Agriculture, Business, Distributive, Home Economics and Trade and Industrial Education to gain experience in developing analysis documents for sixty-one different occupations. Representatives from Business, Industry, Medicine, and Education were involved with the vocational instructors in conducting the analysis process.

The project was conducted in three phases. Phase one involved the planning and development of the project strategies. The analysis process was based on sound principles of learning and behavior. Phase two was the identification, selection and orientation of all participants. The training and workshop sessions constituted the third phase. Two-week workshops were held during which teams of vocational instructors conducted an analysis of the occupations in which they had employment experience. The instructors were assisted by both occupational consultants and subject matter specialists.

The project resulted in producing one hundred two trained vocational instructors capable of conducting and assisting in a comprehensive analysis of various occupations. Occupational analysis data were generated for sixty-one occupations. The analysis included a statement of the various tasks performed in each occupation. For each task the following items were identified: tools and equipment; procedural knowledge; safety knowledge; concepts and skills of mathematics, science and communication needed for successful performance in the occupation. The analysis data provided a basis for generating instructional materials, course outlines, student performance objectives, criterion measures as well as identifying specific supporting skills and knowledge in the academic subject areas.

PREFACE

This document describes the duties and tasks performed by a laboratory assistant from a behavioral standpoint, analyzing each as to what the worker does, what mental processes he/she uses and how he/she reacts to the work situation.

The tasks required to accomplish the following are to develop competency in skills and related technical knowledge, to become familiar with chemical and medical terminology, to develop desirable work habits and attitudes necessary to obtain gainful employment, and to work in medical, research and development (r&d), and quality control laboratory occupations.

Although there are no task sheets listing attributes for personal development, this is a very important aspect of a program.

No specific duties were listed except for the medical portion of a program because the tasks are general in nature and provide an opportunity to develop a variety of general skills that are adaptable to a variety of employment situations.

ACKNOWLEDGMENT

We wish to acknowledge the valuable assistance rendered by the following subject matter specialists. They provided input to the vocational instructors in identifying related skills and concepts of each respective subject matter area and served as training assistants in the analysis process during the two-week workshops.

JOB DESCRIPTION

A general laboratory assistant performs laboratory tests, applying practical knowledge of one or more fields to problem solving, according to perscribed standards, to determine chemical and physical characteristics or composition of solid, liquid, or gaseous materials. Using independent judgment and discretion in planning lab work, he/she conducts, tests and makes qualitative and quantitative analyses of materials for purposes such as quality control, process control, product development, determining conformity to specifications and the maintainence of health and safety standards.

A laboratory assistant works under the direction of a biochemist, chemical laboratory chief, analytical chemist, inorganic chemist, organic chemist, physical chemist, metallurgist, pathologist or medical technologist to carry out assigned tasks. He/she learns progressively more comprehensive duties and advances in ability to apply knowledge. He/she assists in supervision, training and development of lower level personnel.

A laboratory assistant prepares chemical solutions according to standard formulas. He/she also sets up, operates and adjusts laboratory equipment, such as ovens, gas cylinders, kilns, vacuum chambers, grinders, agitates, centrifuges, and condensers to prepare material for testing.

In industrial testing the laboratory assistant performs physical tests according to established procedures on dry and liquid substances used as ingredients in adhesives, lubricants, paint, paper and other products for purity, viscosity, density, absorption, melting point and flash point using tension balance, pH meter, and other instruments. He/she tests samples of manufactured products to verify conformance with heat resistance, tensile strength, ductility and other specifications.

A laboratory assistant in the medical laboratory performs routine tests in treatment and diagnosis of disease. He/she also prepares tissue samples for pathologist, takes blood samples and executes such laboratory tests as urinalyses and blood counts, using microscope, spectrophotometer, and similar instruments.

JOB DESCRIPTION CONTINUED

A laboratory assistant records and interprets operating and test data. By personal observation and investigation, he/she determines conformance to established procedures, methods and standards. He/she prepares written test reports, including graphs and charts describing procedures used, results obtained and conclusions reached.

Duty A Performing Laboratory Techniques

1 Clean glassware
2 Separate substances by filtration and decantation
3 Separate substances by evaporation and distillation
4 Determine density
5 Prepare solutions
6 Titrate solutions
7 Standardize solutions
8 Purify by coagulation and sedimentation
9 Determine boiling point
10 Determine melting point
11 Analyze by qualitative methods
12 Perform chromatography
13 Prepare a dispersion

(TASK STATEMENT) CLEAN GLASSWARE

TOOLS, EQUIPMENT, MATERIALS, OBJECTS ACTED UPON	PERFORMANCE KNOWLEDGE	SAFETY -- HAZARD
Dirty glassware Cleaning liquid Soap or detergent Brush Wash basin	Determine nature of contaminant Select appropriate cleaning method	Safety Always know characteristics of cleaning solutions Always wear protective clothing and glasses Evacuate fumes Properly handle glassware Hazard Chemical burn Lacerations Inhalation of noxious fumes Explosion and/or fire
DECISIONS	**CUES**	**ERRORS**

(TASK STATEMENT) CLEAN GLASSWARE

SCIENCE	MATH – NUMBER SYSTEMS
Forces acting on a body immersed or floating in a liquid [solubility] Possible chemical reactions of cleaning materials Arrangement of molecules, atoms and ions and the effect on structure and strength of materials Necessary concentrations of solutions Transfer of heat from one body to another	

COMMUNICATIONS

PERFORMANCE MODES	EXAMPLES	SKILLS/CONCEPTS

Duty B Operating Laboratory Equipment

1 Operate bunsen burner
2 Measure with calibrated glassware
3 Calibrate burette
4 Weigh with balances
5 Read barometer and thermometer
6 Operate pH meter
7 Operate centrifuge
8 Operate spectrophotometer
9 Operate microscope
10 Operate ovens
11 Operate timing devices
12 Operate autoclave
13 Operate muffle furnace
14 Measure with micrometer
15 Install regulators
16 Operate incubators and waterbaths
17 Operate dispersator
18 Operate microtome
19 Operate linear slide rule

30

(TASK STATEMENT) OPERATE BUNSEN BURNER

TOOLS, EQUIPMENT, MATERIALS, OBJECTS ACTED UPON	PERFORMANCE KNOWLEDGE	SAFETY – HAZARD
Bunsen burner Fuel source (gas) Tubing Striker	Identify purpose of each part Trace route of gas Adjust gas for proper flame Adjust air intake for proper flame	Safety Keep away from volatile solvents Turn off gas when flame is out Hazard Burns Inhalation of gas fumes
DECISIONS	**CUES**	**ERRORS**
Determine proper adjustment	Flame is hottest directly above inner cone (oxidizing flame) Blue flame is desirable	Insufficient heat Fumes, Smoke

(TASK STATEMENT) OPERATE BUNSEN BURNER

SCIENCE	MATH – NUMBER SYSTEMS
Combustion Transfer of energy from one form to another [potential to kinetic]	Ratio and proportion

COMMUNICATIONS

PERFORMANCE MODES	EXAMPLES	SKILLS/CONCEPTS
Viewing	Size and color of flame	Visual analysis, Color discrimination

(TASK STATEMENT) MEASURE WITH, CALIBRATED GLASSWARE

42

TOOLS, EQUIPMENT, MATERIALS, OBJECTS ACTED UPON	PERFORMANCE KNOWLEDGE	SAFETY - HAZARD
Calibrated glassware such as: graded cylinders flasks beakers pipets burettes centrifuge tube tubes Liquid to measure Lab record book	Pour liquids safely Handle glassware Determine meniscus	Safety Use of glassware correctly Wear protective devices Hazard Lacerations

DECISIONS	CUES	ERRORS
Select proper device	Cleanliness is essential for accurate measurement	Inaccuracies Contamination

42

(TASK STATEMENT) MEASURE WITH CALIBRATED GLASSWARE

SCIENCE	MATH – NUMBER SYSTEMS
Meniscus	Metric system of measurement Given an instrument of measure, to determine precision and/or accuracy with respect to relative error, tolerance and significant digits Liquid and dry measures [metric] Given a coding system, recognize and identify each unit involved by assigning necessary symbols, numerical or literal

COMMUNICATIONS

PERFORMANCE MODES	EXAMPLES	SKILLS/CONCEPTS
Writing	Record results in lab record book	Penmanship, spelling, usage

(TASK STATEMENT) CALIBRATE BURETTE

TOOLS, EQUIPMENT, MATERIALS, OBJECTS ACTED UPON	PERFORMANCE KNOWLEDGE	SAFETY -- HAZARD
Burette Distilled water Beaker or flask Balance (top loader) Thermometer Graph paper Straight edge Pencil Laboratory record book	Volumetrically measure distilled water Weigh distilled water Record temperature Repeat at 10 ml. intervals Calculate error Draw calibration graph	Safety Use glassware correctly

DECISIONS	CUES	ERRORS
Determine if repetition is necessary	Clean equipment is essential Interpret results for approximate accuracy and precision	Inaccurate results

(TASK STATEMENT) CALIBRATE BURETTE

SCIENCE	MATH – NUMBER SYSTEMS
Relationship between volume and weight Effect of heating and cooling on expansion of materials [change of dimensions]	Basic arithmetic skills Measure of metric weight Measures of temperature [to include Kelvin] Liquid and dry measures [metric] Development of graphs comparing two complimentary sets of figures Read and interpret charts, tables, and/or graphs Calculate mean Deviation from the mean Given an instrument of measure, determine precision, and/or accuracy with respect to relative error tolerance, and significant digits

COMMUNICATIONS

PERFORMANCE MODES	EXAMPLES	SKILLS/CONCEPTS
Writing	Record results in lab record book	Penmanship, spelling, terminology, logic
	Prepare graph of results

DECISIONS	CUES	ERRORS
Select type of timer Check operation	Type of procedure Sound or movement	Improper timing Lost sequence

(TASK STATEMENT) OPERATE TIMING DEVICES

SCIENCE	MATH – NUMBER SYSTEMS
	Addition and subtraction of whole numbers Multiplication and division with whole numbers

COMMUNICATIONS

PERFORMANCE MODES	EXAMPLES	SKILLS/CONCEPTS
Reading	Timing device	Detail/inference

(TASK STATEMENT) OPERATE AUTOCLAVE

TOOLS, EQUIPMENT, MATERIALS, OBJECTS ACTED UPON	PERFORMANCE KNOWLEDGE	SAFETY - HAZARD
Autoclave Water Material to be autoclaved	Degree of sterilization necessary Evacuate air from autoclave Operate using manual Interpret dials and indicators	Safety Steam burns Hazard Burns

DECISIONS	CUES	ERRORS
Determine proper water level	Usual conditions are 121° C - 15 to 20 minutes	Damaged equipment or material Lost time

(TASK STATEMENT) OPERATE AUTOCLAVE

SCIENCE	MATH – NUMBER SYSTEMS
Reactions of steam under pressure Conditions necessary for adequate sterilization	Pressure gauge Temperature scale

COMMUNICATIONS

PERFORMANCE MODES	EXAMPLES	SKILLS/CONCEPTS
Reading	Operating instructions manual, dials and indicators	Comprehension, terminology, detail/ inference

(TASK STATEMENT) OPERATE MUFFLE FURNACE

TOOLS, EQUIPMENT, MATERIALS, OBJECTS ACTED UPON	PERFORMANCE KNOWLEDGE	SAFETY - HAZARD
Furnace Temperature measuring device Asbestos gloves Long tongs Crucibles Material to be fired Analytical balance	Set appropriate temperature Determine length of time necessary to operate	Safety Use protective devices Use tongs to insert and remove specimens Do not exceed temperature range of furnace Do not handle crucible with hands Hazard Burns
DECISIONS	**CUES**	**ERRORS**
Permit furnace to equilibrate Determine end point in firing process	Gages and light cycle	Burn out elements

(TASK STATEMENT) OPERATE MUFFLE FURNACE

SCIENCE	MATH – NUMBER SYSTEMS
Indestructability of energy and matter Effect of heating and cooling on expansion of materials [change of dimensions] Composition of matter, including protons, neutrons, electrons, atoms, molecules, elements Transfer of heat from one body to another Arrangement of molecules, atoms, and ions and the effect on structure and strength of materials Resistance of materials to change in shape [fluidity, elasticity, melting and boiling points]	Measures of temperature [to include Kelvin] Measure of metric weight Liquid and dry measures [metric]

COMMUNICATIONS

PERFORMANCE MODES	EXAMPLES	SKILLS/CONCEPTS
Reading	Operating instructions, temperature indicator	Comprehension, terminology, detail/inference

(TASK STATEMENT) MEASURE WITH MICROMETER

TOOLS, EQUIPMENT, MATERIALS, OBJECTS ACTED UPON	PERFORMANCE KNOWLEDGE	SAFETY - HAZARD
Outside micrometer caliper Dial indicator	Hold micrometer Read micrometer scale Proper feel of micrometer for drag	Safety Never measure a rotating shaft Protect form exposure to corrosive Health protective devices Hazard Injury to hand

DECISIONS	CUES	ERRORS
Degree of accuracy required	Surface condition of micrometer and material to be measured	Damage to micrometer or sample

(TASK STATEMENT) MEASURE WITH MICROMETER

SCIENCE	MATH – NUMBER SYSTEMS
Work input, work output, friction and efficiency in simple machines [feel for drag] Arrangement of molecules, atoms and ions and the effect on structure and strength of materials [over tightening]	Measure of length [to include metric] Addition and subtraction of decimal fractions Given an instrument of measure, determine precision and/or accuracy with respect to relative error, tolerance and significant digits Multiplication and division with whole numbers

COMMUNICATIONS

PERFORMANCE MODES	EXAMPLES	SKILLS/CONCEPTS
Reading	Scales and/or dial indicators	Detail/inference, comprehension, technical terminology

(TASK STATEMENT) INSTALL REGULATORS

TOOLS, EQUIPMENT, MATERIALS, OBJECTS ACTED UPON	PERFORMANCE KNOWLEDGE	SAFETY - HAZARD
Regulator Bottled gas Wrench Tubing Fittings	Remove cap Secure gas cylinder Purge valve Secure regulator to tank Purge regulator Connect transmission line	Safety Hydrocarbon material Releaf valve Open tank valve all the way Protective devices Hazard Possible explosion

DECISIONS	CUES	ERRORS
Select proper operating pressure Select proper gauge for different type of gases	Type of regulator Type of gases	Damage to equipment

(TASK STATEMENT) INSTALL REGULATORS

SCIENCE	MATH – NUMBER SYSTEMS
Gay - Lussac law Charles law Boyles law	Numbering system Tank pressure Work pressure

COMMUNICATIONS

PERFORMANCE MODES	EXAMPLES	SKILLS/CONCEPTS
Reading	Instruction manuals	Comprehension

(TASK STATEMENT) OPERATE INCUBATORS AND WATERBATHS

TOOLS, EQUIPMENT, MATERIALS, OBJECTS ACTED UPON	PERFORMANCE KNOWLEDGE	SAFETY - HAZARD
Incubator or waterbath Material to be incubated Water for waterbath Thermometer	Determine purpose of incubation Determine temperature requirements for particular procedure	Safety Keep water away from electrical equipment Hazard Electrical shocks

DECISIONS	CUES	ERRORS
Select temperature	Make sure temperature remains constant Keep water level constant Temperature [illegible]	Damage test media Over heating

(TASK STATEMENT) OPERATE INCUBATORS AND WATERBATHS

SCIENCE	MATH – NUMBER SYSTEMS
Optimum growth requirements Optimum color development or reaction completion	

COMMUNICATIONS

PERFORMANCE MODES	EXAMPLES	SKILLS/CONCEPTS
Reading	Procedures	Comprehension

(TASK STATEMENT) OPERATE DISPERSATOR

72

TOOLS, EQUIPMENT, MATERIALS, OBJECTS ACTED UPON	PERFORMANCE KNOWLEDGE	SAFETY - HAZARD
Dispersing equipment Liquid Material to be dispersed Container Dispersing media Microscope Power source	Set up according to direction Operate according to directions Select and assemble proper equipment	Safety Selection of proper electrical source Hazard Electrical shock
DECISIONS	**CUES**	**ERRORS**
Select dispersion equipment Select dispersing media if required Determine purpose and expected results	Recognize failure of equipment to perform	Improper dispersion

(TASK STATEMENT) OPERATE DISPERSATOR

SCIENCE	MATH – NUMBER SYSTEMS
Centrifugal forces developed by bodies in rotation (force tending to discharge material from a rotating body) Forces acting on a body immersed or floating in a liquid Resistance of materials to liquid flow measure of particle size

(TASK STATEMENT) OPERATE LINEAR SLIDE RULE

TOOLS, EQUIPMENT, MATERIALS, OBJECTS ACTED UPON	PERFORMANCE KNOWLEDGE	SAFETY - HAZARD
Slide rule	Check and adjust scale alignment Determine proper scales Manipulate fine adjustment of the slide and cross hair	Safety Handle with care Hazard Misalignment of scales

DECISIONS	CUES	ERRORS
Scales required for calculation Select proper index	Standard procedures	Improper reading

(TASK STATEMENT) OPERATE LINEAR SLIDE RULE

SCIENCE	MATH – NUMBER SYSTEMS
Theory of scale function	Multiplication and division with whole numbers Multiplication and division of decimal fractions Rounding off decimals and whole numbers Extracting square root Understanding and use of logarithms Scientific notation Use of trigonometric functions in solution of problems involving right triangles

COMMUNICATIONS

PERFORMANCE MODES	EXAMPLES	SKILLS/CONCEPTS
Reading	Instruction manual, scale	Comprehension, detail/inference

Duty C Utilizing Communication Skills

1 Read and follow specifications (procedures)
2 Prepare table of data
3 Prepare graphs
4 Make oral presentation
5 Record data in laboratory record book
6 Write reports
7 Utilize reference material

78

(TASK STATEMENT) READ AND FOLLOW SPECIFICATIONS (PROCEDURES)

TOOLS, EQUIPMENT, MATERIALS, OBJECTS ACTED UPON	PERFORMANCE KNOWLEDGE	SAFETY – HAZARD
Specifications Laboratory record book Equipment and material called for in specifications	Read for general information Read for specifics Assemble materials and equipment Follow logical sequential order of specified work Report work in specified terms	Hazard Specified results are determined by following procedures specified
DECISIONS	**CUES**	**ERRORS**
Determine and select proper specifications		

(TASK STATEMENT) READ AND FOLLOW SPECIFICATIONS (PROCEDURES)

SCIENCE	MATH – NUMBER SYSTEMS
	Reporting data in mathematical terms specified

COMMUNICATIONS

PERFORMANCE MODES	EXAMPLES	SKILLS/CONCEPTS
Reading Writing	Report work finished	Comprehension, technical terminology Penmanship, spelling, progress reports, terminology

(TASK STATEMENT) PREPARE TABLE OF DATA

TOOLS, EQUIPMENT, MATERIALS, OBJECTS ACTED UPON	PERFORMANCE KNOWLEDGE	SAFETY - HAZARD
Laboratory record book Pencil Columned paper Data to be tabulated	Determine purpose of the table Organize data in logical arrangement Label accurately Enter data	

DECISIONS	CUES	ERRORS
Size of tables	Type of data	Difficult to read

(TASK STATEMENT) PREPARE TABLE OF DATA

SCIENCE	MATH – NUMBER SYSTEMS
	Report data is specified mathmatical terms Use of numbers (without calculation) Indexing Coding

COMMUNICATIONS

PERFORMANCE MODES	EXAMPLES	SKILLS/CONCEPTS
Writing	Prepare table: column heading, footnotes, numerical data	Penmanship, informational reports, format/content, usage
Reading	Information to be tabulated	Detail/inference, speed/rate

(TASK STATEMENT) PREPARE GRAPHS

TOOLS, EQUIPMENT, MATERIALS, OBJECTS ACTED UPON	PERFORMANCE KNOWLEDGE	SAFETY - HAZARD
Graph paper Pencil Straight edge French curve Data to be graphed	Determine purpose for the data and use of graph Apply general terminology pertaining to graphs Prepare graphs using a) linear paper, b) semi-log paper, c) log-log paper	

DECISIONS	CUES	ERRORS
Select size of graph paper	Type of indicator to be used	Poor readability

(TASK STATEMENT) PREPARE GRAPHS

SCIENCE	MATH – NUMBER SYSTEMS
	Read and interpret charts, tables, and/or graphs Development of graphs comparing two complimentary sets of figures Locate by approximation rational numbers and integers on the number line (sequential ordering)

COMMUNICATIONS

PERFORMANCE MODES	EXAMPLES	SKILLS/CONCEPTS
Reading Writing Speaking	Graphs, charts Plot graphs With supervisor	Comprehension, recommendation reports Penmanship, format, usage Enunciation, poise, terminology/ vocabulary

(TASK STATEMENT) MAKE ORAL PRESENTATION

TOOLS, EQUIPMENT, MATERIALS, OBJECTS ACTED UPON	PERFORMANCE KNOWLEDGE	SAFETY - HAZARD
Laboratory records	Speak clearly and concisely in "trade" language and corresponding "common" language Analyze and interpret laboratory results orally	
DECISIONS	**CUES**	**ERRORS**

(TASK STATEMENT) MAKE ORAL PRESENTATION

SCIENCE	MATH – NUMBER SYSTEMS

(TASK STATEMENT) RECORD DATA IN LABORATORY RECORD BOOK

TOOLS, EQUIPMENT, MATERIALS, OBJECTS ACTED UPON	PERFORMANCE KNOWLEDGE	SAFETY - HAZARD
Laboratory record book Pen Data to be recorded	Enter Title Date Purpose Procedure Data Observations Calculations Conclusions	
DECISIONS	**CUES**	**ERRORS**

(TASK STATEMENT) RECORD DATA IN LABORATORY RECORD BOOK

SCIENCE	MATH – NUMBER SYSTEMS
	Basic arithmetic skills Measure of metric length & weight, time & speed, temperature [to include Kelvin], liquid & dry measures [metric] Extracting square root Solution of problems involving numerical & literal algebraic expressions Use of exponents to indicate the power of a number Addition of positive and negative numbers Algebraic subtraction, multiplication and division of numerical and literal terms Manipulation of formula involving three factors Ratio and proportion Determination of area and volume of cylinders Development of graphs comparing two complimentav sets of figures Given an instrument of measure, determine precision and/or accuracy with respect to relative error, tolerance, and significant digits; Scientific notation Calculate mean, deviation from mean, and relative average deviation (in % or ppt)

COMMUNICATIONS

PERFORMANCE MODES	EXAMPLES	SKILLS/CONCEPTS
Reading	Test results	Comprehension, terminology, technical vocabulary, detail/inference
Writing	Record in lab book	Penmanship, precision and conciseness

(TASK STATEMENT) WRITE REPORTS

TOOLS, EQUIPMENT, MATERIALS, OBJECTS ACTED UPON	PERFORMANCE KNOWLEDGE	SAFETY - HAZARD
Laboratory record book Paper Pen	Organizing factual information to: Write record of telephone conversation Write letter report Write informational (progress) report Write analytical report Develop data in a logical manner	Hazard Protection
DECISIONS	**CUES**	**ERRORS**
Determine audience level	Nature of data and use of report	Insufficient information

(TASK STATEMENT) WRITE REPORTS

SCIENCE	MATH – NUMBER SYSTEMS
Inductive reasoning	Organize data

COMMUNICATIONS

PERFORMANCE MODES	EXAMPLES	SKILLS/CONCEPTS
Reading Writing	Lab records Informational and analytical reports, Section of annual reports and other external and internal publications	Comprehension Clarity of expression, proper word usage, grammatical and technical precision, progress report, physical experiment

(TASK STATEMENT) UTILIZE REFERENCE MATERIAL

TOOLS, EQUIPMENT, MATERIALS, OBJECTS ACTED UPON	PERFORMANCE KNOWLEDGE	SAFETY – HAZARD
References Handbook of chemistry and physics Others	Flexibility in interpreting basis Technical vocabulary	
DECISIONS	**CUES**	**ERRORS**

(TASK STATEMENT) UTILIZE REFERENCE MATERIAL

SCIENCE	MATH – NUMBER SYSTEMS
Chemical symbols	Read and interpret charts, tables, and/or graphs Scientific notation

COMMUNICATIONS

PERFORMANCE MODES	EXAMPLES	SKILLS/CONCEPTS
Reading	Chemical and mathematic notation	Comprehension, terminology, detail/ inference

Duty D Collecting Blood

1 Determine type blood sample needed
2 Preform capillary puncture
3 Perform venipuncture using syringe or vacutainer
4 Prepare blood samples for analysis

(TASK STATEMENT) DETERMINE TYPE BLOOD SAMPLE NEEDED

TOOLS, EQUIPMENT, MATERIALS, OBJECTS ACTED UPON	PERFORMANCE KNOWLEDGE	SAFETY - HAZARD
Requisition for blood test	Determine time of drawing Interpret from procedure whether serum, plasma, whole blood are needed Determine amount blood necessary Determine type anticoagulant needed dictated by tests to be performed a)Sodium floride (glucose) b)Potassium oxalate (chemistry process) c)Double oxalate (hemotology) d)EDTA (hemotology) e)Sodium atrate (prothrombin) f)Heparin	

DECISIONS	CUES	ERRORS

(TASK STATEMENT) DETERMINE TYPE BLOOD SAMPLE NEEDED

SCIENCE	MATH – NUMBER SYSTEMS
Anticoagulant theory Blood clotting mechanism Characteristics of different anticoagulants Composition of blood Treatment necessary to obtain: 1) serum 2) plasma 3) whole blood	

COMMUNICATIONS

PERFORMANCE MODES	EXAMPLES	SKILLS/CONCEPTS
Reading	Requests for laboratory work, procedure	Comprehension, technical (medical) terminology

(TASK STATEMENT) PERFORM CAPILLARY PUNCTURE

TOOLS, EQUIPMENT, MATERIALS, OBJECTS ACTED UPON	PERFORMANCE KNOWLEDGE	SAFETY - HAZARD
Alcohol Lancet Cotton Collection equipment for specific tests	Determine collection site Apply antiseptic Puncture site to obtain free flowing sample Remove blood sample Stop bleeding	Safety Complete sterility must be maintained Used blades must be discarded safely Technician should not ''stick''self Hazard Contamination of sample Infect patient - unsterile conditions Lacerations from used blades Infection of technician

DECISIONS	CUES	ERRORS
Determine where to take sample	Area used must be free from organisms or edema First drop of blood can not be used Excessive squeezing contaminates sample with tissue fluid Pipets should not touch skin	Contamination Injury

(TASK STATEMENT) PERFORM CAPILLARY PUNCTURE

SCIENCE	MATH – NUMBER SYSTEMS
Circulatory system Aseptic conditions	

COMMUNICATIONS

PERFORMANCE MODES	EXAMPLES	SKILLS/CONCEPTS
Reading	Requisitions	Comprehension, technical (medical) terminology
Writing	Labels	Accuracy, Penmanship

(TASK STATEMENT) PERFORM VENIPUNCTURE USING SYRINGE OR VACUTAINER

TOOLS, EQUIPMENT, MATERIALS, OBJECTS ACTED UPON	PERFORMANCE KNOWLEDGE	SAFETY - HAZARD
Alcohol Cotton or gauge Syringe and needle -or- Shield, vacutainer, needle Tourniquet	Prepare patient Prepare needle and syringe Apply the tourniquet Select vein Apply antiseptic Insert needle Withdraw blood Release tourniquet Withdraw needle Prevent bleeding Transfer blood to proper container	Safety Aseptic conditions must prevail Used equipment must be disposed of properly Tourniquet application must not be prolonged - release before withdrawing needle Needle should not go through vein Artery should not be punctured Assure not to puncture self Hazard Infections of patient Hematoma Prolonged bleeding from lack of pressure applied Lacerations

DECISIONS	CUES	ERRORS
Select proper location	Arterial blood spurts; venous flows Needle and syringe must be dry Needle must be large enough to prevent trauma Blood must be allowed to flow Patient and technician must be in comfortable position	Injury Miss vein or puncture vein

98

(TASK STATEMENT) PERFORM VENIPUNCTURE USING SYRINGE OR VACUTAINER

SCIENCE	MATH – NUMBER SYSTEMS
Circulatory system-anatomy and physiology Aseptic conditions Patient concern and treatment	

COMMUNICATIONS

PERFORMANCE MODES	EXAMPLES	SKILLS/CONCEPTS
Reading	Requisitions	Comprehension, technical (medical) terminology, process report - instructions
Writing	Labels	Accuracy, penmanship

(TASK STATEMENT) PREPARE BLOOD SAMPLES FOR ANALYSIS

TOOLS, EQUIPMENT, MATERIALS, OBJECTS ACTED UPON	PERFORMANCE KNOWLEDGE	SAFETY – HAZARD
Blood sample Anticoagulant Centrifuge Test tubes or vacutainers Pasteur pipet and bulb Refrigerator - freezer	Mix whole blood samples with anti-coagulant Mix samples for plasma, centrifuge and separate plasma from cells Prepare serium samples a) allow blood to clot b) centrifuge c) aspirate serium from clot Label specimens completely Store specimens if possible	Safety Balance centrifuge Use pipets carefully Do not aspirate serium into mouth Do not preserve unless absolutely necessary Hazards **Distortion of sample** **Breakage of sample** Lacerations Breakdown of constituents

DECISIONS	CUES	ERRORS
Decide what analysis to be made	Hemolysis necessitates redrawing of specimen Abnormalities in sample should be noted Clean, dry glassware must be used Most determinations must be performed in fresh specimens. If stored, allow to return to room temperature before use	Improper results

(TASK STATEMENT) PREPARE BLOOD SAMPLES FOR ANALYSIS

SCIENCE	MATH – NUMBER SYSTEMS
Composition of blood Characteristics of blood Appearance of blood - normal and abnormal	

COMMUNICATIONS

PERFORMANCE MODES	EXAMPLES	SKILLS/CONCEPTS
Reading	Instructions	Comprehension, technical (medical) terminology
Writing	Label specimens	Penmanship, accuracy

Duty E Performing Hematology Tests

1 Perform RBC using hemacytometer
2 Perform WBC using hemacytometer
3 Perform hemoglobin by cyanmethemoblobin method
4 Perform microhematocrit
5 Prepare blood smear
6 Stain blood smear
7 Examine blood smear
8 Perform erythrocyte sedimentation rate by Wintrobe method
9 Perform bleeding time (Duke or Ivy)
10 Perform coagulation tests
11 Perform prothrombin time
12 Perform reticulocyte count
13 Perform platelet count
14 Calculate indices
15 Maintain hematology equipment

102

(TASK STATEMENT) PERFORM RBC USING HEMACYTOMETER

TOOLS, EQUIPMENT, MATERIALS, OBJECTS ACTED UPON	PERFORMANCE KNOWLEDGE	SAFETY -- HAZARD
RBC diluting pipet (thoma) Aspirator tubing and mouthpiece Blood sample Diluting fluid - Hayem's, Gower's solution Mechanical shaker Hemacytometer Hemacytometer cover glass Alcohol or xylene Microscope Cell counter Pipet cleaning solutions - water, alcohol, acetone Gauze Laboratory record book	Dilute blood sample 1:200 Mix and mount on hemacytometer Count RBC in 1/5 mm^2 on microscope with high dry (40x) Calculate RBC/mm^3	Safety Coverglass can be broken if lens touches Solutions cannot be aspirated into mouth Hazard Scratched or cracked lens Broken coverglass Poisoning from chemicals
DECISIONS	**CUES**	**ERRORS**
In severe anemia, dilution can be altered	Repeat until 10% agreement reached Glassware must be clean Improper mounting of specimen causes errors in count	

(TASK STATEMENT) PERFORM RBC USING HEMACYTOMETER

SCIENCE	MATH – NUMBER SYSTEMS
Characteristics and purpose of RBC's Formation of RBC's Decrease = anemia Increase = polycythemia Function of hemacytometer Normal = 4.5 - 5.5 million/mm^3 - men = 4.0 - 5.0 million/mm^3 - women Terminology of RBC and diseases Sources of error Parts of CBC Destruction of RBC Variations from normal	Formula - $\frac{\text{Number of cells counted x dilution in 1/5 mm}}{\text{0.2 area x 0.1 depth}} = RBC/mm^3$ or number of cells x 20,000 Ratio and proportion Basic arithmetic skills

COMMUNICATIONS

PERFORMANCE MODES	EXAMPLES	SKILLS/CONCEPTS
Reading	Directions	Comprehension, technical (medical) terminology
Writing	Record results, labels	Penmanship, spelling, accuracy

(TASK STATEMENT) PERFORM WBC USING HEMACYTOMETER

TOOLS, EQUIPMENT, MATERIALS, OBJECTS ACTED UPON	PERFORMANCE KNOWLEDGE	SAFETY -- HAZARD
WBC diluting pipet (thoma) Aspirator tubing and mouthpiece Blood sample Diluting fluid - 2% acetic acid or 0.1N HCL Mechanical shaker Hemacytometer Hemacytometer cover glass Alcohol Microscope Cell counter Pipet cleaning solutions Gauze Laboratory record book	Dilute sample 1:20 Mix and mount on hemacytometer Count WBC in four corner square mm with low power (10x) Calculate WBC/mm^3	Safety Aspirate blood and diluting fluid carefully Cover glass can be broken if lens touches Hazard Scratched or cracked lens Broken coverglass Chemical poisoning

DECISIONS	CUES	ERRORS
Identify area to be used in count	Count cells touching top and left linear Repeat to agreement within 500/mm^3	Faulty equipment Faulty technique Cell distribution Nature of sample Small sample size

(TASK STATEMENT) PERFORM WBC USING HEMACYTOMETER

SCIENCE	MATH – NUMBER SYSTEMS
Characterisrics and purposes of WBC Formation of WBC's Increase = leukocytosis Decrease - leukopenia Function of reagent and equipment Normal = 5000 - 10,000/mm^3 Terminology of WBC and diseases Sources of error Parts of CBC	$\frac{\text{Number of cells counted} \times \text{dilution of blood}}{\text{Volume (area} \times \text{depth)}} = WBC/mm^3$ or number counted x 50 Ratio and proportion Basic arithmetic skills

COMMUNICATIONS

PERFORMANCE MODES	EXAMPLES	SKILLS/CONCEPTS
Reading Writing	Procedures Record results, label	Comprehension, medical terminology Penmanship, spelling, accuracy

(TASK STATEMENT) PERFORM HEMOGLOBIN BY CYANMETHEMOGLOBIN METHOD

TOOLS, EQUIPMENT, MATERIALS, OBJECTS ACTED UPON	PERFORMANCE KNOWLEDGE	SAFETY – HAZARD
Spectrophotometer Drabkin's reagent (fresh) Cuvettes Pipettes Sahli pipet Tubing and mouthpiece Blood sample Semi-log graph paper Straight edge Commercial hemoglobin standard Laboratory record book Timer	Standardize photometer using commercial standards. Draw calibration curve Dilute blood 1:251 (5 ml reagent .02 blood) Allow color development Read percent transmittence on photometer Determine concentration from calibration curve	Safety Drabkin's reagent is poisonous Hazard Inhalation of fumes
DECISIONS	**CUES**	**ERRORS**
Determine conditions of equipment and reagents	Accuracy is dependent or technique, equipment, reagent stability, glassware cleanliness Control should be utilized to check technique, equipment, reagents Rinse Sahli pipet with reagent	Improper results

(TASK STATEMENT) PERFROM HEMOGLOBIN BY CYANMETHEMOGLOBIN METHOD

SCIENCE	MATH – NUMBER SYSTEMS
Characteristics and purposes of hemoglobin Anemia = decrease in quality and quantity of RBC and hemoglobin Compounds of hemoglobin Terminology and abbreviation - hemoglobin	Liquid and dry measures [metric] Ratio and proportion Read and interpret charts, tables, and/or graphs Measure with the metric system Given an instrument of measure, determine precision and/or accuracy with respect to relative error, tolerance, and significant digits Measure of time Basic arithmetic skills

COMMUNICATIONS

PERFORMANCE MODES	EXAMPLES	SKILLS/CONCEPTS
Reading Writing	Procedure Record results, label, draw calibration graph	Comprehension, medical terminology Penmanship, spelling, accuracy, format description

(TASK STATEMENT) PERFORM MICRO-HEMATOCRIT

TOOLS, EQUIPMENT, MATERIALS, OBJECTS ACTED UPON	PERFORMANCE KNOWLEDGE	SAFETY - HAZARD
Capillary or whole blood sample Heparinized capillary tubes Plasticene or seal-ease (sealing medium) Micro-hematocrit centrifuge Micro-capillary reader Laboratory record book	Fill capillary tube Seal vacant end Centrifuge Read % on reader	Safety Use caution when handling capillary tubes Do not lift cover until rotation has completely stopped Hazard Trauma - lacerations Trauma - to operator
DECISIONS	**CUES**	**ERRORS**
Determine how to take sample	Blood sample must be properly collected and preserved Centrifugation must be standardized	Improper results

(TASK STATEMENT) PERFORM MICRO-HEMATOCRIT

SCIENCE	MATH – NUMBER SYSTEMS
Uses of hematocrit Comparison of RBC tests RBC diseases and characteristics Normal = 40 - 50% males 37 - 45% females Centrifugal forced developed by bodies in rotation [force tending to discharge material from a rotating body]	Read and interpret charts, tables, and/or graphs Basic arithmetic skills

COMMUNICATIONS

PERFORMANCE MODES	EXAMPLES	SKILLS/CONCEPTS
Reading Writing	Procedures Record results, label	Comprehension, medical terminology Penmanship, accuracy

(TASK STATEMENT) PREPARE BLOOD SMEAR

TOOLS, EQUIPMENT, MATERIALS, OBJECTS ACTED UPON	PERFORMANCE KNOWLEDGE	SAFETY – HAZARD
Capillary blood sample Precleaned glass slides Spreader slide Pencil	Spread drop of blood with spreader slide thinly Air dry smear Label accurately in blood	Hazard Lacerations from slides

DECISIONS	CUES	ERRORS
Select methods for preparing smear	Blood must not be contaminated with tissue fluid or antiseptics Feather edge indicates good smear - smooth, moderately thin	Damage sample Poor quality smear

(TASK STATEMENT) PREPARE BLOOD SMEAR

SCIENCE	MATH – NUMBER SYSTEMS
Purpose of blood smears Terminology of hematology Characteristics of good smears Sources of blood samples	

COMMUNICATIONS

PERFORMANCE MODES	EXAMPLES	SKILLS/CONCEPTS
Writing	Label	Penmanship, accuracy

(TASK STATEMENT) STAIN BLOOD SMEAR

TOOLS, EQUIPMENT, MATERIALS, OBJECTS ACTED UPON	PERFORMANCE KNOWLEDGE	SAFETY -- HAZARD
Well made blood smear Wright's stain Phosphate buffer (pH 6.4) Water Staining rack Timer	Fix smear with Wright's stain Add buffer to stain Wash with water Wipe dye off back of slide Air dry, standing on end	Hazard Stained hands and cloths

DECISIONS	CUES	ERRORS
Determine standards for accuracy	Accurate timing is essential Metallic sheen should form with buffer pH must be exact Errors occur due to reagents, timing Timing varies with each batch of reagents Rapid drying prevents distortions	Incorrect results

(TASK STATEMENT) STAIN BLOOD SMEAR

SCIENCE	MATH – NUMBER SYSTEMS
Wright's stain fixes dead cells Chemical affinity of tissues for stain pH hypotonic - hypertonic	Measure of time

COMMUNICATIONS

PERFORMANCE MODES	EXAMPLES	SKILLS/CONCEPTS
Reading	Procedure	Comprehension, technical (medical) terminology

(TASK STATEMENT) EXAMINE BLOOD SMEAR

TOOLS, EQUIPMENT, MATERIALS, OBJECTS ACTED UPON	PERFORMANCE KNOWLEDGE	SAFETY – HAZARD
Properly stained blood smear Microscope Immersion oil Blood cell calculator Laboratory record book	Evaluate smear quality with low power objective Estimate white count and scan for abnormal cells (low power) Examine RBC morphology (oil immersion) Evaluate platelets (oil) Identify and count 100 WBC's (oil) Repeat abnormalities and % of each type WBC	Hazard Microscope lens can be scratched or broken

DECISIONS	CUES	ERRORS
Questionable smears should be reviewed by pathologist	Number of cells to be counted is dependent on total WBC	

(TASK STATEMENT) EXAMINE BLOOD SMEAR

SCIENCE	MATH – NUMBER SYSTEMS
Types of white cells - Neutrophils, Eosinophils, Basophils Lymphocytes, Manocytes Appearance of normal and abnormal or immature RBC's and WBC's **Blood cell developmental series** Abnormal RBC conditions - anisocytosis, **parkilocytosis,** hypochromasia, sickle cells, polychromatophilia, basophylic stippling, mecleated red blood cells, target cell Terminology of hematology Objectives of differential Disorders indicated by abnormalities Correlation with otner hematology tests	Correct for nucleated RBC Correction = $\frac{\text{uncorrected/mm}^3}{100 + \text{number nucleated RBC}}$ Finding a percent of a number and what percent one number is of another Locate by approximation rational numbers and integers on the number line (sequential ordering)

COMMUNICATIONS

PERFORMANCE MODES	EXAMPLES	SKILLS/CONCEPTS

Reading	Procedures, correction chart	Comprehension, technical (medical) terminology
Writing	Record results, label	Penmanship, spelling, accuracy

(TASK STATEMENT) PERFORM BLEEDING TIME (DUKE OR IVY)

TOOLS, EQUIPMENT, MATERIALS, OBJECTS ACTED UPON	PERFORMANCE KNOWLEDGE	SAFETY -- HAZARD
70% alcohol Lancet Stopwatch Blotting paper Cotton Blood pressure cuff Laboratory record book	Perform capillary puncture Time bleeding accurately	Hazard Technician should not stick self
DECISIONS	**CUES**	**ERRORS**
Decide where to puncture	Adequate, standardized punctures are essential (3mm depth) Prolonged or shortened results must be repeated Increase shows platelet decrease	Improper results

(TASK STATEMENT) PERFORM BLEEDING TIME (DUKE OR IVY)

SCIENCE	MATH – NUMBER SYSTEMS
Clotting mechanism Tissue factors Normal = 1-6 minutes	Measure of time

COMMUNICATIONS

PERFORMANCE MODES	EXAMPLES	SKILLS/CONCEPTS
Reading Writing	Procedures Results	Comprehension, technical terminology Penmanship, spelling

(TASK STATEMENT) PERFORM COAGULATION TESTS

TOOLS, EQUIPMENT, MATERIALS, OBJECTS ACTED UPON	PERFORMANCE KNOWLEDGE	SAFETY -- HAZARD
Test tubes (ID, 8 mm) Blood sample Stopwatch Non-heparinized capillary tubes Lancet Syringe and needle Alcohol and cotton balls Tourniquet Saline Laboratory record book	Describe clot retration Interpret capillary coagulation time Accurately read Lee-White clotting time	Safety - use glassware correctly Hazard - lacerations from tubes
DECISIONS	**CUES**	**ERRORS**
Determine proper sample appearance	Tissue juice contamination alters results (shortens time) Tests do not differentiate between clotting deficiencies and anticoagulant presence Capillary tests are unreliable Lee-White is influenced by test tube size and surface, temperature, and agitation	Poor sample Improper results

121

(TASK STATEMENT) PERFORM COAGULATION TESTS

SCIENCE	MATH – NUMBER SYSTEMS
Blood coagulation theory Normal Lee-White = 15 - 25 minutes Normal clot retraction = Begin 1 hour Complete 18 hours Capillary coagulation time = 2 - 6 minutes Methods of prolonging or retarding coagulation time	Measure of time

COMMUNICATIONS

PERFORMANCE MODES	EXAMPLES	SKILLS/CONCEPTS
Reading Writing	Procedures Record results	Comprehension, medical terminology Penmanship, spelling, accuracy

(TASK STATEMENT) PERFORM PROTHROMBIN TIME

123

TOOLS, EQUIPMENT, MATERIALS, OBJECTS ACTED UPON	PERFORMANCE KNOWLEDGE	SAFETY – HAZARD
Blood sample preserved with sodium oxalate (0.1M) Stock thromboplastin Saline 0.02 M Ca Cl_2 Control solution Centrifuge Test tubes - 8 x 75 mm 37° C incubator Timer Pipets Light source Laboratory record book	Prepare correct 1:10 blood sample Perform and interpret control solutions Observe clot formation accurately	

DECISIONS	CUES	ERRORS
Determine standards of accuracy	Must be preformed within four hours of drawing specimen Used often for patients on anticoagulant therapy or screening for deficiencies Samples must be performed in duplicate or triplicate and agree within one second Controls must be used to validate reagents and procedure Accurate timing is essential	Improper timing Incorrect results

(TASK STATEMENT) PERFORM PROTHROMBIN TIME

SCIENCE	MATH – NUMBER SYSTEMS
Blood coagulation theory and mechanism Normal = 11.2 - 14.5 seconds Mechanism of anticoagulant therapy	Dilutions Measure of time Measure of metric volume Basic arithmetic skills

COMMUNICATIONS

PERFORMANCE MODES	EXAMPLES	SKILLS/CONCEPTS

Duty F Performing Clinical Chemistry Tests

1 Perform glucose test by Nelson-Samogyi method
2 Perform glucose by Folin-Wu method
3 Perform urea nitrogen test by nesslerization
4 Perform uric acid test
5 Perform creatinine test (Folin method)
6 Perform total protein, albumin, globulin test (Biuret method)(TP/AG)
7 Perform cholesterol test
8 Perform chloride test (Scholes and Scholes)
9 Perform carbon dioxide (CO_2) determination (Van Slyke)
10 Perform sodium and potassium determination (Flame photometer)
11 Perform calcium test (Clark-Callip)
12 Perform inorganic phosphorous test
13 Perform amylase test (Samogyi method)
14 Perform SGOT, SGPT, LDH tests (Sigma)
15 Perform alkaline and acid phosphatase tests
16 Perform VDB (Van Den Bergle) test (Mallay and Eoelyn)
17 Perform icteues index, thymol turbidity, cephalin cholesterol flocculation
18 Perform BSP (Bromsulfonphthalien) test

(TASK STATEMENT) PERFORM GLUCOSE TEST BY NELSON – SAMOGYI METHOD

TOOLS, EQUIPMENT, MATERIALS, OBJECTS ACTED UPON	PERFORMANCE KNOWLEDGE	SAFETY – HAZARD
Sample of serium, plasma, whole blood urine or CSF Test tubes Pipet Distilled water Barium hydroxide Zinc sulfate Centrifuge Folin-Wu sugar tubes Alkaline copper tartrate Boiling water bath Cold water bath Arsenomal update color reagent Glucose standard Spectrophotometer Cuvettes Graph paper Timer Heat source Controls Lab record book	Prepare protein - free filtrate Place samples in Folin-Wu tubes Perform color reactions and dilute Calibration spectrophotometer Read % T values Determine concentration from graph with mg %	Safety Reliability and accuracy of results Proper glassware handling Chemical handling Sources of error Hazards Patient's well-being hangs in balance Burns - heat plus chemical Lacerations
DECISIONS	**CUES**	**ERRORS**
Set proper wavelength Check quality control	Accurate timing is essential Reagents must be fresh Inadequate mixing	Incorrect results

134

431

(TASK STATEMENT) DETERMINE PRESENCE OF KETONE BODIES IN URINE

TOOLS, EQUIPMENT, MATERIALS, OBJECTS ACTED UPON	PERFORMANCE KNOWLEDGE	SAFETY -- HAZARD
Urine specimen Sodium nitroprusside Ammonium sulfate Ammonium hydroxide Test tubes Acetest tablets Ketostix 10% ferric chloride Timer Heat source	Perform Rothera's test Use acetest (Ames) Use Ketostix (Ames) Perform Jerhardt's test Read results	
DECISIONS	**CUES**	**ERRORS**
Determine standards for accuracy	These tests are performed when glucose is positive Timing is critical	Incorrect results

(TASK STATEMENT) DETERMINE PRESENCE OF KETONE BODIES IN URINE

SCIENCE	MATH – NUMBER SYSTEMS
Digestion and assimilation of fats Diabetes mellitus causes and effects Types of ketone bodies Physiologic effects of ketone accumulation Chemical reactions of tests	Dilutions Metric system measure of volume

COMMUNICATIONS

PERFORMANCE MODES	EXAMPLES	SKILLS/CONCEPTS
Reading Writing	Literature supplied by manufacturer Record results	Comprehension, medical terminology Penmanship, spelling

(TASK STATEMENT) PERFORM TEST FOR BILE AND UROBILINOGEN IN URINE

TOOLS, EQUIPMENT, MATERIALS, OBJECTS ACTED UPON	PERFORMANCE KNOWLEDGE	SAFETY -- HAZARD
Urine specimen Lab record book Fouchet's reagent Barium chloride paper Ictotest (Ames) Water Color comparison chart Ehrlich's reagent Sodium acetate Chloroform Butanol Test tube Separatory funnel Graduated glassware Bililabstix	Perform Harrison's test Use Ictatest tablets (Ames) Perform Ehrlich's qualitative test for urobilinogen Use Bililabstix (Ames) Read results	Safety Chemicals used in Ehrlich's test chlorinated are aromatic solvents Hazard Inhalation of chemical fumes
DECISIONS	**CUES**	**ERRORS**
Select timing device	Color of urine indicates need to perform test for bile Timing is critical	Misread results Improper timing

185

(TASK STATEMENT) PERFORM TEST FOR BILE AND UROBILINOGEN IN URINE

SCIENCE	MATH – NUMBER SYSTEMS
Kidney function Digestive system RBC breakdown process Chemical reactions of RBC destruction Chemical reactions of tests for bile Liver function	Metric system measure of volume

COMMUNICATIONS

PERFORMANCE MODES	EXAMPLES	SKILLS/CONCEPTS
Reading Writing	Literature supplied by manufacturer Record results	Comprehension, medical terminology Penmanship, spelling

(TASK STATEMENT) PERFORM TEST FOR BLOOD IN URINE AND FECES

TOOLS, EQUIPMENT, MATERIALS, OBJECTS ACTED UPON	PERFORMANCE KNOWLEDGE	SAFETY -- HAZARD
Urine specimen or feces Lab record book Glacial acetic acid Hydrogen peroxide Gum guaiac Ethanol Filter paper Dropping tube Hemastix Hematest Color comparison charts Bililabstix	Perform gum guaiac test Use Hemastix (Ames) Use Hem test tablets (Ames) Use Bililabstix (Ames) Read results	Safety Use chemicals with care Hazard Burns

DECISIONS	CUES	ERRORS
Identify blood	Many chemical substances, if present, interfere with these tests	Misread sample

(TASK STATEMENT) PERFORM TEST FOR BLOOD IN URINE AND FECES

SCIENCE	MATH – NUMBER SYSTEMS
Kidney function RBC morphology and breakdown Chemical reactions of tests	Metric measure of volume

COMMUNICATIONS

PERFORMANCE MODES	EXAMPLES	SKILLS/CONCEPTS
Reading Writing	Literature supplied by manufacturer Record results	Comprehension, medical terminology Penmanship, spelling

(TASK STATEMENT) PERFORM MICROSCOPIC EXAMINATION OF URINE

TOOLS, EQUIPMENT, MATERIALS, OBJECTS ACTED UPON	PERFORMANCE KNOWLEDGE	SAFETY – HAZARD
Urine specimen Centrifuge Centrifuge tubes Glass slides Cover slip Microscope Lab record book	Centrifuge specimen Decant supernatant Place sediment on slide Examine microscopically Identify normal and abnormal constituents under high and lower power and estimate number	Hazard Scratched or cracked lens Broken slides
DECISIONS	**CUES**	**ERRORS**
Select equipment and procedure Identify type of crystals	Remove amorphous before centrifugation Standing of urine cause distortion or breakdown of sediment	Misread sample

(TASK STATEMENT) PERFORM MICROSCOPIC EXAMINATION OF URINE

SCIENCE	MATH – NUMBER SYSTEMS
Kidney physiology and anatomy Digestion process Characteristics, morphology of biologic and chemical sediment Blood cells Casts Crystals Epithelial cells Bacteria Miscellaneous substances	Counting sequentially

COMMUNICATIONS

PERFORMANCE MODES	EXAMPLES	SKILLS/CONCEPTS

Writing	Record results	Penmanship, spelling, accuracy
Viewing	Specimen	Visual analysis, Detail/inference

(TASK STATEMENT) PERFORM RENAL FUNCTION TEST

TOOLS, EQUIPMENT, MATERIALS, OBJECTS ACTED UPON	PERFORMANCE KNOWLEDGE	SAFETY – HAZARD
Properly collected urine specimens 1000 ml graduated cylinder Water Sodium hydroxide Spectrophotometer Graph paper Urinometer Hydrometer jar Lab record book	Perform PSP (Phenolsulf on phthalein) test Measure volume Adjust pH Calibrate spectrophotometer Read % T of unknowns Determine value from graph Perform Mosenthal's Concentration Test Measure volume Measure specific gravity	Safety Sodium hydroxide is corrosive Hazard Burns

DECISIONS	CUES	ERRORS

(TASK STATEMENT) PERFORM RENAL FUNCTION TESTS

SCIENCE	MATH – NUMBER SYSTEMS
Kidney function Absorption and filtration Liver function Hydrogen ion concentration Water balance in body Specific gravity and density Kidney pathology	Draw graph Metric measure of volume Basic arithmetic skills

COMMUNICATIONS

PERFORMANCE MODES	EXAMPLES	SKILLS/CONCEPTS
Reading Writing	Graph Record results	Comprehension, medical terminology Penmanship, spelling, accuracy

Duty H Performing Bacteriology Procedures

1 Sterilize equipment and supplies
2 Prepare culture media
3 Innoculate culture media
4 Incubate cultures
5 Determine culture morphology
6 Prepare bacterial slides
7 Stain slides using gram stain
8 Determine microscopic morphology
9 Identify bacteria
10 Determine drug sensitivity

193

(TASK STATEMENT) STERILIZE EQUIPMENT AND SUPPLIES

TOOLS, EQUIPMENT, MATERIALS, OBJECTS ACTED UPON	PERFORMANCE KNOWLEDGE	SAFETY – HAZARD
Equipment Glassware Used or contaminated equipment Autoclave Burner (Bunsen or alcohol) Water source 75% alcohol Soap solution Internal timer	Sterilize transfer needles and loops by burning Wrap small equipment and supplies Autoclave at 121°C for 15 - 20 minutes at 15 pounds pressure	Safety Open fire Pressure in autoclave and heat Glassware can be broken Improper sterilization will not kill bacteria Hazard Burns Explosion Lacerations Bacterial contamination

DECISIONS	CUES	ERRORS
Select methods of sterilization Select autoclave	Method used depends on nature of material Use of autoclave (steam under pressure) is most effective	Contamination

(TASK STATEMENT) STERILIZE EQUIPMENT AND SUPPLIES

SCIENCE	MATH – NUMBER SYSTEMS
Resistance of microorganisms to sterilization Gas laws Effect of chemicals on microorganisms	Measure of temperature [to include Kelvin] Ratio and proportion

COMMUNICATIONS

PERFORMANCE MODES	EXAMPLES	SKILLS/CONCEPTS
Reading	Thermometer, gauge	Detail/inference

(TASK STATEMENT) PREPARE CULTURE MEDIA

TOOLS, EQUIPMENT, MATERIALS, OBJECTS ACTED UPON	PERFORMANCE KNOWLEDGE	SAFETY — HAZARD
Dehydrated media Distilled water Balance Weighing paper or dish Volumetric glassware Autoclave Water source Petri dishes Sterile tubes Plugs Nutrient additives, i.e. blood Heat source Beakers Stirring device	Accurately weigh correct amount of dehydrated media Dilute accurately Sterilize Pour plates or tubes agar slants broth tubes agar plates fermentation tubes Use sterile transfer technique Store in refrigerator	Safety Use sterile techniques Hazard Burn Lacerations Contaminated plates

DECISIONS	CUES	ERRORS
Determine type media nedessary	Use of media Shelf-life of prepared media Accurate timing is essential Denaturization of sugars at elevated temperature and pressure	Media will not set-up

196

196

(TASK STATEMENT) PREPARE CULTURE MEDIA

SCIENCE	MATH – NUMBER SYSTEMS
Cultural requirements of bacteria Selective, differential and enrichment media characteristics	Proportions and ratios Percent measures Measures of metric volume Measure of metric weight

COMMUNICATIONS

PERFORMANCE MODES	EXAMPLES	SKILLS/CONCEPTS
Reading	Directions for preparation on media	Comprehension, medical terminology

(TASK STATEMENT) INNOCULATE CULTURE MEDIA

198

TOOLS, EQUIPMENT, MATERIALS, OBJECTS ACTED UPON	PERFORMANCE KNOWLEDGE	SAFETY – HAZARD
Culture specimen Media Bunsen burner or alcohol lamp Transfer loop or needle	Determine appropriate culture media Sterilize loop or needle, tube lips Use sterile technique for transfer Use appropriate innoculation techniques	Safety Sterile techniques must be utilized Hazard Burns Bacterial contamination
DECISIONS	**CUES**	**ERRORS**
Select innoculation technique	Media used dependent on type specimens Innoculation techniques is dependent on type media	Improper culture growth

198

(TASK STATEMENT) INNOCULATE CULTURE MEDIA

SCIENCE	MATH – NUMBER SYSTEMS
Normal and abnormal flora Characteristics of selective, differential, and enrichment media Cultural requirements of bacteria	

COMMUNICATIONS

PERFORMANCE MODES	EXAMPLES	SKILLS/CONCEPTS
Reading	Difco manual	Comprehension, terminology

(TASK STATEMENT) INCUBATE CULTURES

TOOLS, EQUIPMENT, MATERIALS, OBJECTS ACTED UPON	PERFORMANCE KNOWLEDGE	SAFETY -- HAZARD
Properly innoculate culture media Incubator Brerver anaerobic jar	Incubute under aerobic conditions Incubate using anaerobic conditions Brerver anaerobic jar Innoculate deep in solid media Allow time for growth	Hazard Electrical shocks

DECISIONS	CUES	ERRORS
Select time and temperature	Proper temperature must be controlled Incubator must contain moisture to avoid drying out of cultures	Ruin culture

(TASK STATEMENT) INCUBATE CULTURES

SCIENCE	MATH – NUMBER SYSTEMS
Cultural requirements of bacteria Aerobic and anaerobic conditions Optimum growth requirements	Temperature measurement

COMMUNICATIONS

PERFORMANCE MODES	EXAMPLES	SKILLS/CONCEPTS
Reading	Difco manual	Comprehension, terminology

(TASK STATEMENT) DETERMINE CULTURE MORPHOLOGY

TOOLS, EQUIPMENT, MATERIALS, OBJECTS ACTED UPON	PERFORMANCE KNOWLEDGE	SAFETY — HAZARD
Mature culture Lab record book Hand lens or dissecting microscope Calory counter	Observe color Observe characteristics of colony, i.e. texture, shape, luminous characteristics Observe hemolysis on blood agar Observe motility Observe odor Count calories	Safety Avoid contamination Hazard Contamination of lab and culture

DECISIONS	CUES	ERRORS

202

(TASK STATEMENT) DETERMINE CULTURE MORPHOLOGY

SCIENCE	MATH – NUMBER SYSTEMS
Cultural characteristics of bacteria	

COMMUNICATIONS

PERFORMANCE MODES	EXAMPLES	SKILLS/CONCEPTS
Reading Writing Viewing	Record results Mature culture characteristics	Comprehension, terminology Penmanship, spelling Visual analusis, Detail/inference, Color discrimination

203

(TASK STATEMENT) PREPARE BACTERIAL SLIDES

TOOLS, EQUIPMENT, MATERIALS, OBJECTS ACTED UPON	PERFORMANCE KNOWLEDGE	SAFETY — HAZARD
Slides Mature culture Wire loop or needle Bunsen burner or alcohol burner Distilled water	Make direct smears from specimen Make smears from both cultures Emulsify growth from plate in water on slide Air-dry and fix with heat	Safety Use proper sterile technique Hazards Burns Lacerations from slides Contamination of lab and culture
DECISIONS	**CUES**	**ERRORS**
Select procedure and storage	Excessive heating can destroy bacteria Single layer sample desirable	Lost slide

(TASK STATEMENT) PERPARE BACTERIAL SLIDES

SCIENCE	MATH – NUMBER SYSTEMS
Effects of heat on microorganisms	

205

COMMUNICATIONS

Reading Writing Viewing	Record results Morphology of cell	Comprehension, terminology Penmanship, spelling Visual analysis, Detail/inference

(TASK STATEMENT) IDENTIFY BACTERIA

TOOLS, EQUIPMENT, MATERIALS, OBJECTS ACTED UPON	PERFORMANCE KNOWLEDGE	SAFETY – HAZARD 210
Selective and differential media Culture specimen Culture characteristics Microscopic characteristics	Determine culture morphology Determine microscopic morphology Determine staining characteristics Determine chemical reactiveness Determine differential media reaction Determine optimum culturing temperature Organize flow chart Classify	Safety Use sterile technique Hazard Contaminati·n of lab and culture

DECISIONS	CUES	ERRORS
Classify bacteria	Bacteria patterns	Misread sample

2/10

(TASK STATEMENT) IDENTIFY BACTERIA

SCIENCE	MATH – NUMBER SYSTEMS
Classification of bacteria Characteristics of bacteria Normal flora Pathological organisms	

COMMUNICATIONS

PERFORMANCE MODES	EXAMPLES	SKILLS/CONCEPTS
Reading	Difco manual Handbook of microbiology	Comprehension, technical terminology, vocabulary
Writing	Record results	Penmanship, spelling, accuracy
Viewing	Characteristics of bacteria	Visual analysis, Detail/inference

(TASK STATEMENT) DETERMINE DRUG SENSITIVITY

TOOLS, EQUIPMENT, MATERIALS, OBJECTS ACTED UPON	PERFORMANCE KNOWLEDGE	SAFETY – HAZARD
Pure culture Sensitivity discs	Streak plate with pure culture Add sensitivity discs Incubate Read zone of sensitivity to drugs	Safety Use sterile techniques Hazard Contamination of culture and lab

DECISIONS	CUES	ERRORS
Determine type of sensitivity disc	Type of drug	Improper results

(TASK STATEMENT) DETERMINE DRUG SENSITIVITY

SCIENCE	MATH -- NUMBER SYSTEMS
Bacterial reaction to drugs Normal flora	Use metric measure of length

COMMUNICATIONS

PERFORMANCE MODES	EXAMPLES	SKILLS/CONCEPTS
Reading Writing	Reference material Record results	Comprehension, technical terminology Penmanship, spelling

Duty I Performing Blood Bank and Serology Procedures

1 Perform ABO typing
2 Perform Rh typing
3 Crossmatch
4 Perform VDRL

214

(TASK STATEMENT) PERFORM ABO TYPING

TOOLS, EQUIPMENT, MATERIALS, OBJECTS ACTED UPON	PERFORMANCE KNOWLEDGE	SAFETY – HAZARD
Saline - isotonic Blood sample Anti-A typing sera Anti-B typing sera Slide Test tubes Microscope Centrifuge Lab record book Pipette A cells B cells	Place blood samples in tray Add antigen Observe results	Safety Typing of blood is a life or death procedure Hazard Transfusion reaction Death to patient
DECISIONS	**CUES**	**ERRORS**
Determine type of test technique	Type of test	Contaminated or old typing sera Incorrect cell suspension Timing insufficient Identification insufficient Low sensitivity Improper reading of agglutination Contaminated specimens Glassware dirty

(TASK STATEMENT) PERFORM ABO TYPING

SCIENCE	MATH – NUMBER SYSTEMS
Volume of blood Composition of blood History of transfusions Anticoagulant theory Inheritance of blood groups Antigen - antibody reactions Blood group systems Means of detecting antigen - antibody reactions ABO blood group system Titer Agglutination Typing sera characteristics	Proportions
